TECHNICAL EXPERIENCES

QA Test Engineer Intern May 2025 – Aug 2025

Accurate Technologies Inc, Novi, MI

- Developed and executed automated and manual test cases for embedded automotive software across diagnostic and ECU interfaces
- Detected and resolved 30+ software defects through debugging, regression testing, and root-cause analysis to improve release stability and performance
- Authored detailed test documentation and contributed to Agile QA sprint cycles supporting continuous integration

Backend Software Developer Intern May 2024 – Aug 2024

NeverEnding, Remote

- Developed and optimized backend systems using Django and Django REST Framework for financial applications
- Designed and deployed scalable backend features in Java as part of a full website revamp
- Integrated and tested REST API endpoints with React.js to ensure secure and efficient frontend-backend communication
- Coordinated version control and task tracking using GitHub and Jira

Student Assistant Intern Aug 2024 – Present

Wayne State University C&IT; Helpdesk, Detroit, MI

- Assembled and repaired computers, managed hardware inventory, and supported classroom AV technology
- Developed a self-service portal using C# and Blazor, imaging 500+ devices and improving operational efficiency
- Provided hardware and software support through the campus Help Desk
- Assisted with campus network maintenance and research support initiatives with the High-Performance Computing team

Summer Technology Coach Jun 2024 – Aug 2024

Rocket Companies, Detroit, MI

- Instructed students in HTML, CSS, and JavaScript to build a fully functional platformer game
- Guided students through end-to-end development including responsive design and performance optimization
- Supported debugging and optimization of gameplay mechanics such as collision detection, animations, and scoring

Simple Chat UI Feb 2025 – Present

Personal Project

- Built a chat interface using C++ for backend logic and MATLAB for computational processing
- Designed an HTML/CSS frontend focused on usability and clean visual presentation
- Implemented modular backend logic to support extensibility and future feature expansion

“The Frantic Run” – Endless Runner Game Jul 2024 – Dec 2024

Personal Project

- Implemented movement, scoring, and collision detection mechanics using JavaScript
- Optimized rendering performance and animation loops for smoother gameplay across devices
- Applied game-loop optimization techniques to maintain consistent frame rates

ADDITIONAL EXPERIENCES

Peer Technical Mentor Jan 2025 – Present

Wayne State University

- Provided one-on-one guidance to undergraduate students on programming assignments and debugging strategies
- Assisted peers with coursework in data structures, algorithms, and web development
- Helped students improve code organization, readability, and problem-solving approaches

Student IT Support Assistant (Volunteer) Sep 2024 – Dec 2024

Wayne State University

- Assisted students with basic troubleshooting for software installation, system configuration, and connectivity issues
- Supported setup and maintenance of lab computers and peripheral devices
- Documented common technical issues and solutions to improve future support efficiency

Tutor Aug 2023 – Mar 2024

Mathnasium of Rochester North, Rochester Hills, MI

- Delivered personalized instruction in algebra, calculus, and geometry
- Created customized exam preparation strategies that improved student performance
- Maintained consistent communication with parents regarding student progress and learning goals
